

Call for Chapters

Artificial Intelligence for Climate Learning and Sustainable Development

The International Science, Technology and Innovation Centre for South–South Cooperation (ISTIC) under the auspices of UNESCO, in collaboration with Universitas Negeri Malang (UM), invites contributions to an upcoming edited volume to be published by **Springer Nature (Singapore)**.

This publication aims to bring together global perspectives on the role of artificial intelligence (AI) in advancing climate learning, education systems, and sustainable development.

About the Book

Climate change presents urgent and complex challenges that require informed, inclusive, and forward-looking responses. At the same time, advances in artificial intelligence are transforming how knowledge is generated, accessed, and applied.

This book explores how AI can be strategically leveraged to enhance climate learning, education systems, and sustainable development, particularly in the Global South. It will compile research, policy insights, and practical experiences to inform future directions at the intersection of STI policy, AI, and climate education.

It aims to highlight innovative approaches, policy frameworks, and practical applications that support:

- Climate literacy and education systems
- Sustainable development and resilience
- Ethical, inclusive, and responsible AI use
- Policy innovation and institutional transformation
- Context-specific solutions, particularly in the Global South

Both policy-oriented and practice-based contributions are encouraged.

Available Chapter Topics *(Open for Contribution)*

Part I: Foundations of AI for Climate Learning

- Conceptual Frameworks Linking AI, Climate Literacy, and Sustainability
- AI Technologies for Environmental Intelligence: An Overview
- Data Ecosystems for Climate Learning: Big Data, Remote Sensing, and IoT

Part II: AI Methods and Models for Climate Applications

- Explainable AI (XAI) for Climate Decision-Making

Part III: AI in Climate Education and Learning Systems

- AI-Enhanced Climate Education: Pedagogical Innovations

Part IV: Policy, Governance, and Strategic Implementation

- Governance of AI for Climate Action
- National AI Strategies for Climate Resilience

Part V: AI for Sustainable Development and Societal Impact

- AI for Sustainable Agriculture, Water, and Energy Systems
- Social Innovation, Youth Engagement, and AI for Climate Learning
- Social Innovation and Youth Engagement in Climate Learning
- Future Directions: Responsible AI for Climate and Sustainability

Authors may also propose closely related topics aligned with the book scope.

Submission Process

Step 1: Expression of Interest (EOI)

Interested contributors are invited to submit:

1. Tentative chapter title
2. Author name(s) and affiliation(s)
3. Short abstract or outline (150–300 words)

Deadline for EOI: 21 Sep 2026

Submit to: hannah@istic-unesco.org

Step 2: Full Chapter Submission

Selected contributors will be invited to submit full chapters. Detailed author guidelines, formatting requirements, and submission deadlines will be shared with confirmed authors.

All submissions will undergo a peer-review process .

Publication Details

- Publisher: Springer Nature (Singapore)
- Format: Edited volume (print and digital)
- Estimated chapters: 18–20
- Expected publication: 2027
- No publication fee required

Why Contribute?

- Contribute to a high-impact international publication
- Share knowledge on AI and climate education
- Engage with a global network of experts
- Support South–South cooperation and knowledge exchange
